

TREVOR VINCENT, PHD

(+1) 416 738 6934 \diamond trevor.j.vincent@gmail.com \diamond trevorvincent.com \diamond github.com/trevor-vincent

HIGHLIGHTS

Independent problem solver and researcher with lots of experience presenting scientific work (20+ presentations) and communicating to audiences of different expertise. Currently working on multiple novel projects in the field of machine learning and artificial intelligence.

Experienced C++, C (over 100,000 lines+ in each) and python programmer with expert-level knowledge in numerical solution techniques for partial differential equations and a broad knowledge of machine learning algorithms.

Two years of experience working with a Nobel-prize winning scientific collaboration (LIGO; ligo.org), analyzing time series data and writing simulation software.

Four years of experience working with a team of 10+ programmers developing a next-generation code for upcoming exa-scale supercomputers.

Chess master (title earned in 2008). Former Manitoba chess champion (six consecutive times) and former Canadian scholastic chess champion.

EXPERIENCE

Xanadu

Dec. 2019 - Now

High Performance Computing Specialist

- Xanadu is a hardware company developing a photonic quantum computer.
- I develop high performance C++ codes needed by the company to show Quantum Supremacy.

Canadian Institute for Theoretical Astrophysics

Sept. 2013 - Aug. 2019

PhD Researcher in Computational Astrophysics

- Developed next generation numerical methods for solving the Einstein field equations (a non-linear set of partial differential equations) on supercomputers and implemented them in a $\sim 100,000$ -line code available on GitHub.
- Worked on a team (10+developers) to develop a task-based parallelism framework for numerical relativity called SpECTRE, available on GitHub.
- Member of the LIGO collaboration, working on extracting neutrino and matter emission properties from gravitational wave and electromagnetic counterpart signals of binary neutron star mergers.

University of Winnipeg

2009-2013

Summer Research Scientist

- Developed a state-of-art GPU-accelerated (via CUDA) C++ code for the diffusion and collision of water molecules around randomly oriented axons in 3d brain-matter. This was coupled with a numerical solve of the Bloch partial differential equations to obtain the magnetic resonance imaging signal in realistic environments.
- Developed a Markov chain Monte Carlo code for estimating axon distribution properties from magnetic resonance imaging signals.
- Used machine learning techniques to study brain changes in mice with different Alzheimer-based gene modifications.

EDUCATION

University of Toronto, Toronto, ON*Sept. 2013 - August 2019*

PhD in Physics, specializing in computational astrophysics. PhD work was funded by an NSERC CGSD scholarship (\$105,000) and a NSERC CGSM scholarship (\$30,000).

Advisor: Prof. Harald Pfeiffer

University of Winnipeg, Winnipeg, MB*Sept 2008 - Sept 2013*

Bachelors of Science in Physics. Undergraduate work was funded by 15 scholarships. Winner of the Governor Generals Silver Medal for highest graduating GPA in the university.

SKILLS

Highly Proficient

C++, C, MPI, CUDA, Bash, Git, CMake, Emacs, GDB, LaTeX
Python (Pandas, Matplotlib, scikit-learn, tensorflow, keras, etc)

Substantial Experience

OpenCL, Matlab, Mathematica, HDF5, Paraview, Visit,
SQL, HTML, OpenMP, TravisCI, Jenkins

Working Knowledge

Java, Fortran, Hadoop, Spark

SELECTED AWARDS

NSERC CGSD Scholarship (\$105000)	2015
NSERC CGSM Scholarship (\$30000)	2014
Governor Generals Silver Medal	2013
CIHR Undergraduate Research Award (\$5000)	2013
NSERC Undergraduate Research Award (\$5000)	2012
NSERC Undergraduate Research Award (\$5000)	2011
NSERC Undergraduate Research Award (\$5000)	2010
